MILTON RODRIGUES

Uttara Kannada, Karnataka 581334

Work Experience

Associate Software Engineer | London Stock Exchange Group, Bangalore

June 2022 - present

• Python Developer at Refinitiv, an LSEG Business

Engineer | Tata Elxsi Ltd, Bangalore

August 2021 - May 2022

- Full Stack Developer at Comcast
- Extensive experience in developing Rest API's with Express.js, Node.js, MongoDB and Elasticsearch
- Experience designing and building various React components, Leveraged Material UI React Library for Icons, Tables, Input fields, Buttons, Forms etc
- Embedding Kibana/Tableau Dashboards into React Pages and configuring them to authenticate using a proxy user
- Implemented user authentication using JWT
- Experience configuring TLS/SSL for React and Express services using Self Signed CA certs
- Implemented notification/email fuctionality using node-mailer and cron.
- Leveraged **Docker** to efficiently develop and deploy application into Comcast Infrastructure which was expected to be used by 1000+ employees

Student Intern | IC Solutions Ltd, Bangalore |

November 2020 - December 2020

- Performed exploratory data analysis on automobile price dataset using Pandas, Numpy, Matplotlib and Seaborn
- Leveraged Google Colaboratory, Python's Machine Learning Libraries for processing and predictions
- Utilized clean data set for training ML Models for predicting automobile prices for a given automobile feature
- ML models used : Linear Regression, SVM , Random Forest etc

Education

Bachelor of Computer Science and Engineering

July 2017 - Aug 2021

St Joseph Engineering College, CGPA: 8.29

Mangaluru, Karnataka

Technical Skills

Programming Languages and Libraries: Java, Python, JavaScript **(1)**, HTML/CSS, React.js, Express.js, Pandas, Flask **Database**: MongoDB, Elasticsearch

Database. Mongodd, Enasticscarch

Developer Tools: Linux, Git, GitHub, AWS, Heroku, Netlify, Docker

Projects

Ecommerce Website | React, Redux, MongoDB, Express |

Feb 2022

- Implemented the functionalites of Ecommerce website such as add, update, delete cart, change quantity
- A Node js web application created using React for frontend, Express for REST API's and MongoDB for data storage.

Blog Website | React, Express, MongoDB, JWT | \bigcirc

Jan 2022

- Implemented the functionalities of a Blog Application like Create, Update, Delete Post and User Authentication using JWT
- **Node.js** web application created using React for frontend, Express for creating REST API's and MongoDB for data storage.
- Deployed into AWS EC2 Ubuntu instance and configured to use proxy with Nginx | 6 Deploy Link

Netflix Frontend Clone | React, HTML, SCSS, Javascript | •

Jan 2022

- Implemented frontend of Netflix Website using React. Pages such as Landing Page, Movie Hover Effect, Movie List Scroll, Login, Sign Up etc
- Deployed into **Netlify** with CI-CD pipeline with Github | Deploy Link

Learnings and Certification

Node.js Learning Path- Linkedn Learning | Javascript, Node, React, MongoDB Deep Learning By Coursera | NN, CNN, Numpy, Tensorflow, Keras | \mathcal{O} Certificate Microsoft Technology Associate(MTA) | JavaScript | \mathcal{O} Certificate

June 2020

September 2019

Present

Solved 100+ Problems on Leetcode | & Leetcode Profile HackerRank 5 stars: Python, Java, C++ | & Hacker Rank Profile
